## **NOVOPRESS - PIONEER OF PRESS TECHNOLOGY**

Novopress pressing devices and accessories are suitable for a wide range of applications whether pipe and fittings are stainless steel, carbon steel, copper or plastic and offer you a secure solution in the area of pipe connecting technology:

### **Novopress tool features\*:**

**Fully automatic pressing cycle**

**Log book**

**Battery-empty-detection**

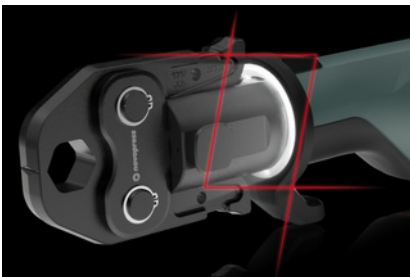

**Illumination of the press area**

**App integration**

## **HIGHLIGHT: NOVOPRESS32**

Novopress presents a new pressing device developed based on the wishes and needs of installers worldwide. The device is designed to deliver increased safety, improved convenience, higher efficiency, and enhanced durability.

The new pressing device reflects Novopress' commitment to user-oriented development and practical solutions.

## **NOVOCHECK APP & NOVOCHECK 2.0 APP**

We work continuously on the development of new practice oriented and up-to-date extensions of our product range. For example, the press tools of our latest generations are equipped with Bluetooth® technology in order to offer an even wider range of service functionalities:

- Data transfer between pressing unit and app
- Ability to check the pressing unit's current status
- Analysis of the press tools' log book
- Integrated report function for documentation of the installation
